

INTRODUCING THE HS BUDDY PROGRAM: Your Peer Support Network

FIND A BUDDY FOR YOUR CLINICAL TRIAL JOURNEY. The HS Buddy Program is a peer support system that connects individuals who are currently participating in a clinical trial or are interested in participating in a clinical trial with a “buddy” who can help navigate decisions and challenges specific to trial involvement.

MATCHED SUPPORT, TAILORED TO YOU. Trial buddies are matched based on criteria identified by you. While we can’t guarantee we can match all preferences, every effort will be made to pair you with a buddy that aligns with your most important qualities. Trial buddies cannot provide medical advice, but can share experiences, provide an open space for listening, and guide you towards additional resources.

YOUR NEXT STEP: SCAN THE QR CODE FOR HS BUDDY PROGRAM DETAILS. To learn more about the HS Buddy Program, please scan the QR code below to be directed to the program website.
